DUBLIN COLLEGE - STILLORGAN
LEVEL 5 PLC COURSES FOR 2026/2027

	**3D Animation**	This course equips students with the creative and technical skills to design characters, craft stories, and produce animated worlds using advanced digital technologies.	
	Animation	This introductory course helps students with little to no experience develop creative and practical skills and build a strong portfolio to gain admission into higher education animation programmes.	
	**Art**	This well-established course helps students develop strong drawing and design skills across a wide range of media and techniques, while guiding them in building a comprehensive portfolio for progression to higher education.	
	Film, Radio and Digital Media	This course provides a broad introduction to media, helping students develop skills in areas such as radio, TV and video production, graphic design, and photography while creating a comprehensive portfolio to support progression into higher education.	
	**Event Management**	This dynamic course introduces students to the growing global industry of event management, developing practical skills to plan, coordinate, and deliver events from concept to completion.	
	Illustration and Design	This stimulating course is ideal for creative and visual individuals, offering the opportunity to explore and develop skills in areas such as illustration, graphic design, fashion, digital design, web design, and product design while enhancing both drawing and digital creativity.	
	**Journalism**	This course provides essential training for a career in journalism, developing skills in idea generation, research, and writing, while offering hands-on experience with industry-standard software for print, digital, radio, and video production.	
	Multimedia Production with Game & UX Design	This well-established course offers a comprehensive introduction to multimedia design and development, preparing students for careers in web design, motion graphics, multimedia production, digital video, graphic design, and emerging new media technologies.	
	**Photography**	This exciting and comprehensive course introduces students to photography, developing their skills and confidence through the study of both digital and traditional methods while creating a professional portfolio to support progression into higher education.	
	Travel & Tourism	This long-established course offers internationally recognised, industry-relevant qualifications in the exciting and dynamic field of Travel and Tourism, preparing students for diverse career opportunities across airlines, tour operations, travel agencies, hotels, and the wider tourism sector.
